STORIES OF CLIMATE MOBILITY
UNDERSTANDING THE IMPACTS, INFORMING
EFFECTIVE RESPONSE

15 NOVEMBER 2022
Jane Linekar
Head of Research

ABOUT THIS PRESENTATION

Using our analytical framework and data to **tell the story of climate mobility** and relay the key messages and findings for **policy and programming.**

1 ABOUT MMC

2 OUR WORK ON
CLIMATE MOBILITY

3 LINKING
CLIMATE
CHANGE & MOBILITY

4 STORIES FROM
AFRICA, ASIA &
LATIN AMERICA

5 KEY MESSAGES

6 FINAL
THOUGHT

ABOUT THE MIXED MIGRATION CENTRE (MMC)

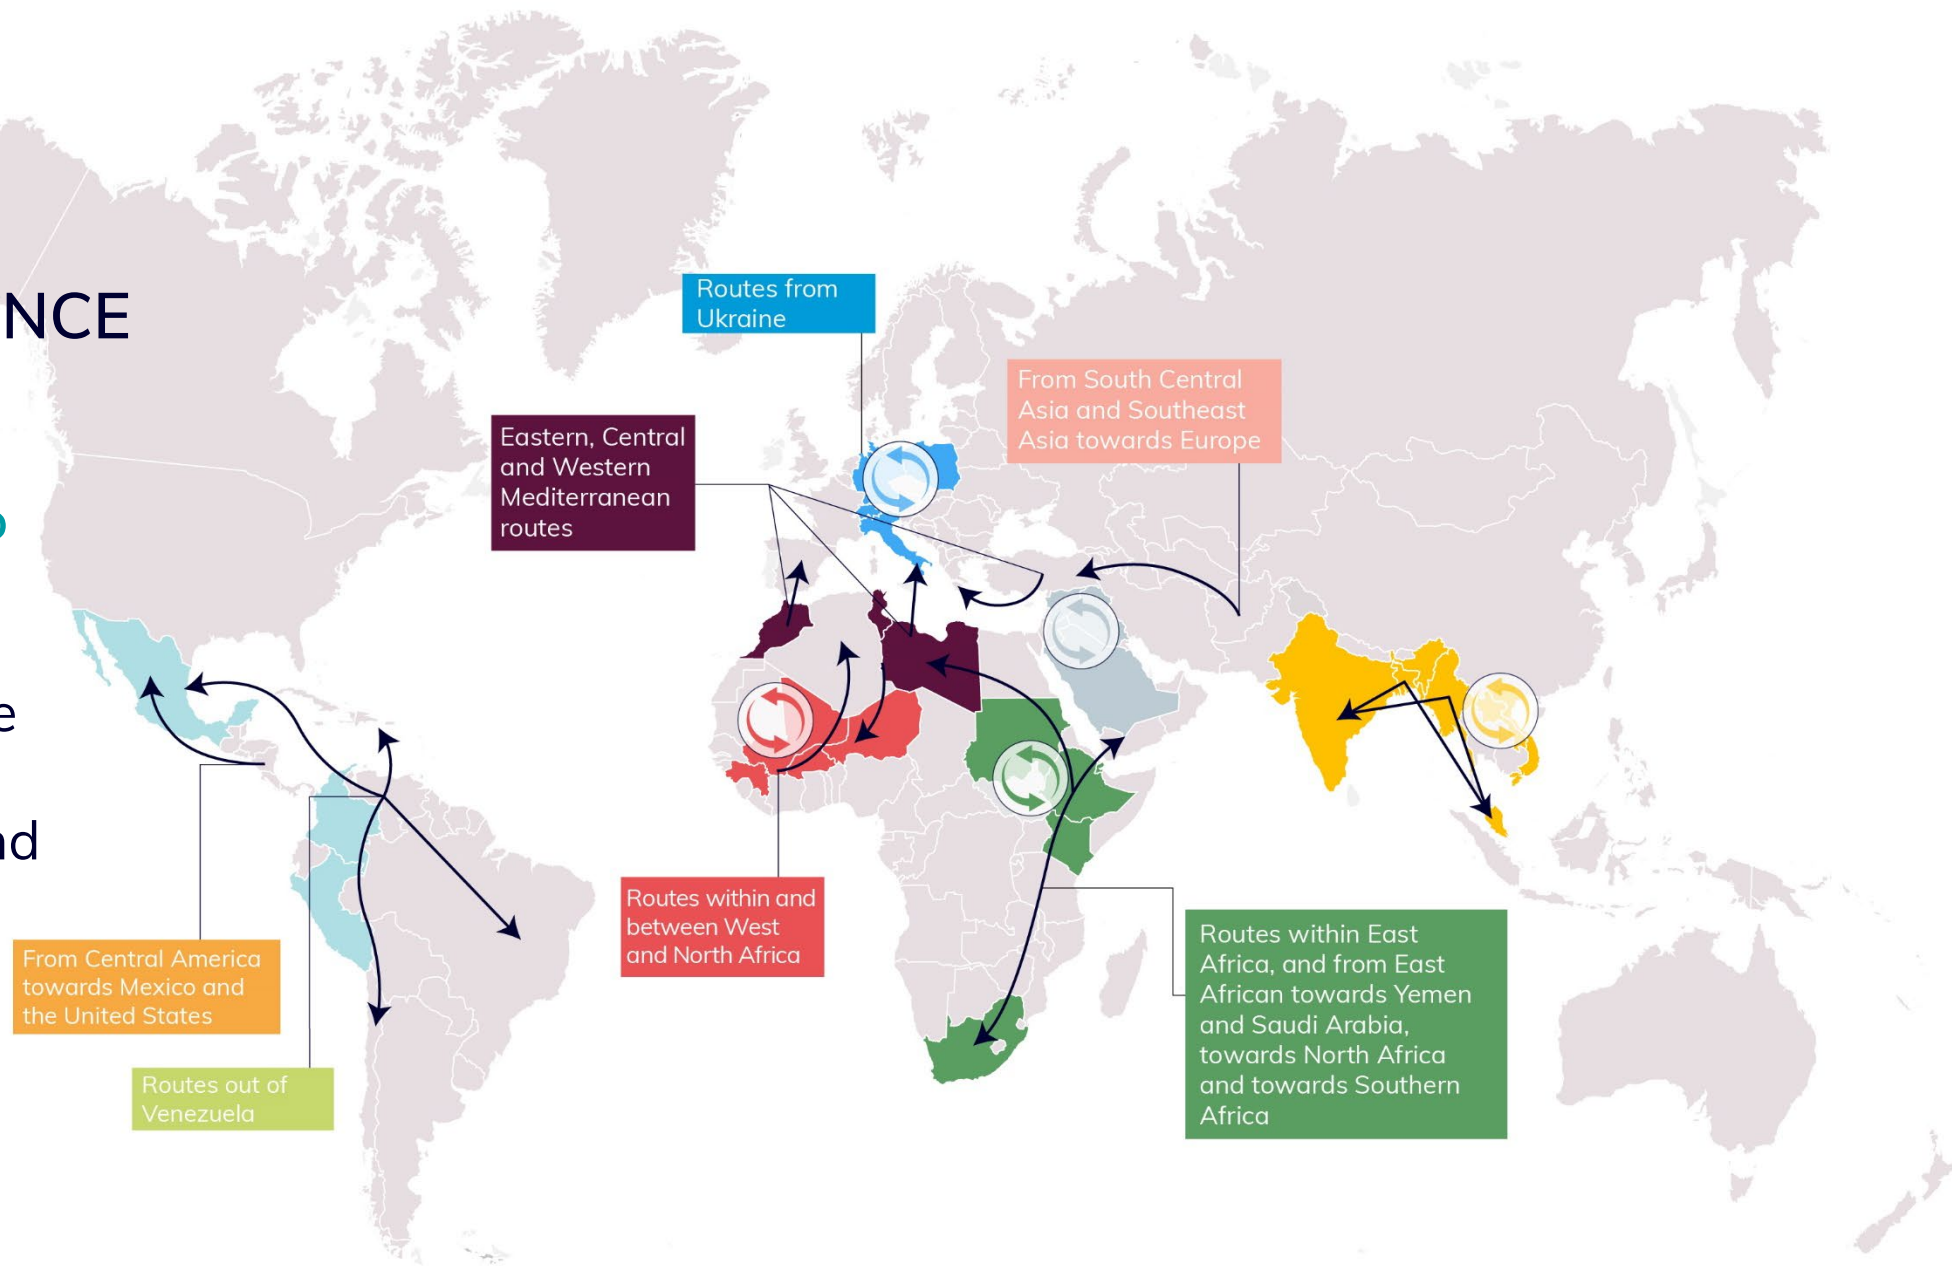

A GLOBAL RESEARCH NETWORK

Focusing on six regions: Asia and the Pacific, East and Southern Africa, Europe, Latin America and the Caribbean, North Africa and West Africa.

Regional hubs are hosted in the Danish Refugee Council (DRC) regional offices in Africa, Asia, Europe and Latin America, and a global team in Geneva.

SOURCE FOR CREDIBLE EVIDENCE & EXPERTISE

Data and analysis to support agencies, policy makers and practitioners to make well-informed decisions in policy and programming responses to mixed migration.

INTRODUCTION TO 4MI

4Mi is the Mixed Migration Centre's **flagship primary data collection system**, conducting survey interviews with **refugees and migrants** on the move in more than **15 countries** to help fill knowledge gaps and inform policy and response.

100,000
Interviews since 2014

120
FIELD ENUMERATORS
19
LANGUAGES

30,000+
Interviews on our
interactive dashboard
since 2019

4Mi
A GLOBAL DATA
COLLECTION INITIATIVE

OUR WORK ON CLIMATE MOBILITY

Better understanding the **links between climate change and mobility** to improve policy and response.

UNDERSTANDING CLIMATE MOBILITY

MMC developed a **conceptual model** to understand better the role of climate change and climate-related events as **drivers of (im)mobility**.

CLIMATE-RELATED ENVIRONMENTAL STRESSORS

ASPIRATIONS TO MIGRATE?

- CLIMATE-RELATED DRIVERS
- OTHER (POLITICAL, ECONOMIC, CULTURAL, SOCIAL ETC.) DRIVERS

CONCEPTUAL FRAMEWORK FOR CLIMATE-INDUCED MOBILITY – DECISION MAKING

EXISTING ADAPTATION STRATEGIES

Existing mobility patterns
Capability to stay
Other adaptation strategies

CAPABILITY TO MIGRATE?

- INDIVIDUAL AND HOUSEHOLD CHARACTERISTICS
- MIGRATION INTERFACE

MIGRATION OUTCOME*
INVOLUNTARY IMMOBILITY

MIGRATION OUTCOME*
FORCED MOBILITY OR TRAPPED

MIGRATION OUTCOME*
VOLUNTARY MOBILITY

MIGRATION OUTCOME*
VOLUNTARY IMMOBILITY

* The line from "voluntary" to "involuntary" is a continuum. The boxes here simplify to clarify the model but do not reflect reality.

KNOWLEDGE PRODUCTS

To better understand the links between climate change and mobility and to gain an understanding of current activities relating to climate mobility.

LINKING THE TWO PHENOMENA

With an increase in the frequency and intensity of extreme weather events, in the near future, growing numbers of people are likely to be **displaced or decide to migrate** or relocate as a response.

**WE MUST RECOGNISE
THE COMPLEXITY OF THE
MULTIPLE FACTORS
CONTRIBUTING TO THE
DECISION-MAKING
PROCESS**

LINKING CLIMATE CHANGE AND MOBILITY AT THE MICRO-LEVEL

4Mi collects thousands of interviews across Africa, Asia, Latin America and the Caribbean to offer a more detailed understanding of mixed migration and **to explore links to climate change.**

LATIN AMERICA & THE CARIBBEAN

4,633

Guatemala, Honduras,
El Salvador, Venezuela
nationals in Colombia,
Costa Rica, Mexico,
Panama, Peru

Data collected: Feb 2021 – June 2022

AFRICA

5,826

West and Central Africans
in Mali, Niger, Burkina Faso,
Libya, Tunisia and Sudan

Data collected Feb – Sep 2021

3,801

East Africans in Somalia,
Sudan, Libya and Tunisia

Data collected: Feb 2021 – Apr 2022

ASIA

5,101

Afghanistan, Bangladesh,
Myanmar, and Pakistan
nationals in Greece,
Indonesia, Italy, Libya,
Malaysia, Tunisia and
Turkey

Data collected: Feb 2021 – June 2022

WHAT WE FOUND

FOR WHAT REASONS DID YOU LEAVE?

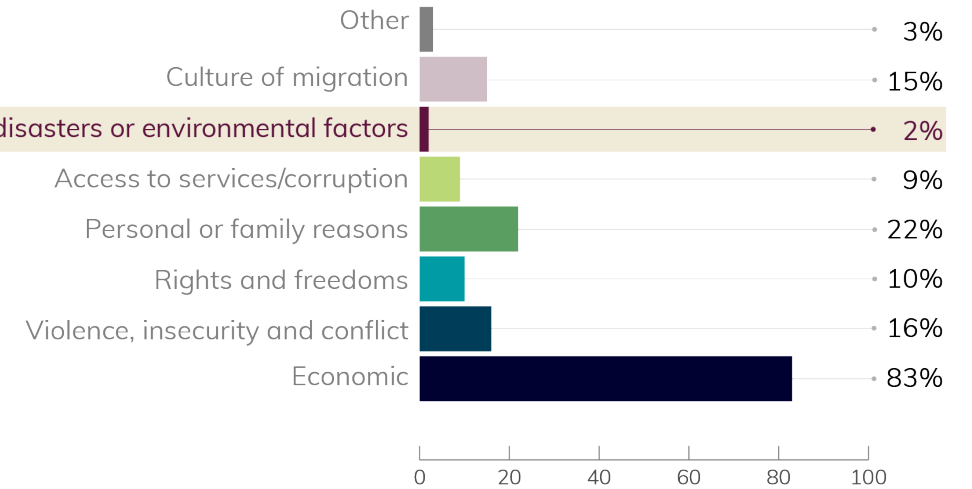

OUTCOME

Respondents frequently reported immediate and proximate drivers related to markets, insecurity, or the political context.

Environmental factors rarely feature in data on primary movement drivers.

EAST AFRICA

WEST & CENTRAL AFRICA

ASIA

LATIN AMERICA

Refused answers were 0%; Don't know answers were 0%

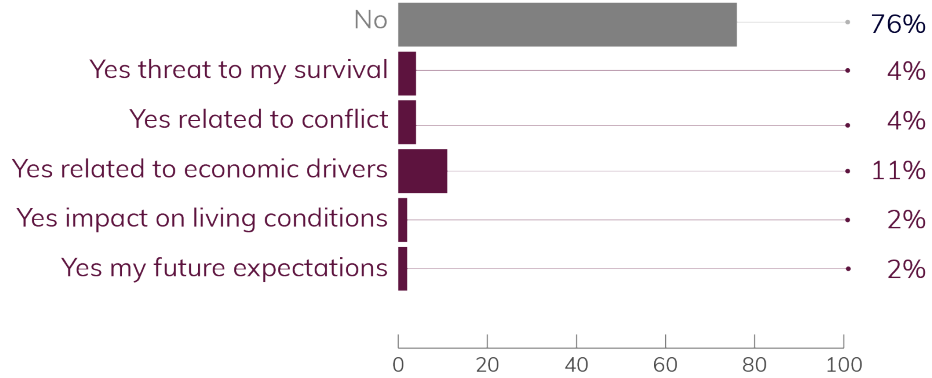

WHAT WE FOUND

WERE ISSUES RELATING TO THE CLIMATE OR THE NATURAL ENVIRONMENT A FACTOR IN YOUR DECISION TO LEAVE YOUR COUNTRY OF DEPARTURE?

OUTCOME

A far greater proportion of respondents said environmental factors did feature in their decision to leave their country of departure.

Environmental factors are more often acknowledged to play a role in the decision to leave a country, when we ask the question directly.

EAST AFRICA

WEST & CENTRAL AFRICA

ASIA

LATIN AMERICA

Refused answers were 0%;
Don't know answers were 6% or below

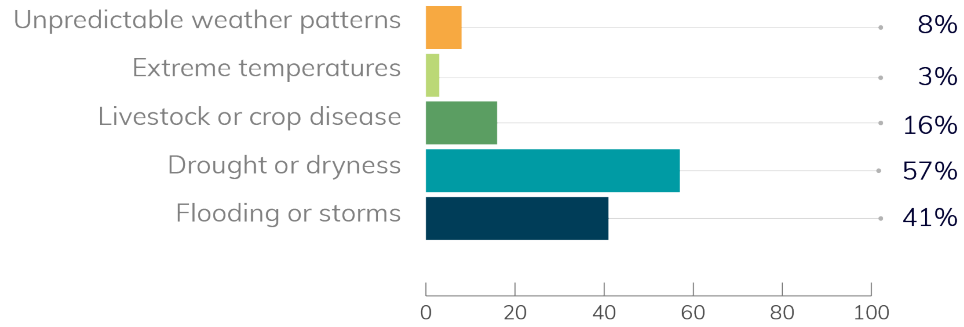

ENVIRONMENTAL FACTORS IMPACTING MIGRATION

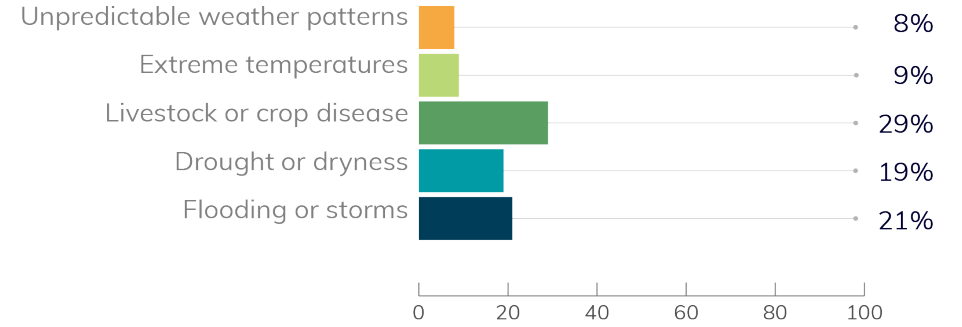

WHAT KIND OF NATURAL DISASTER OR ENVIRONMENTAL FACTOR?

OUTCOME

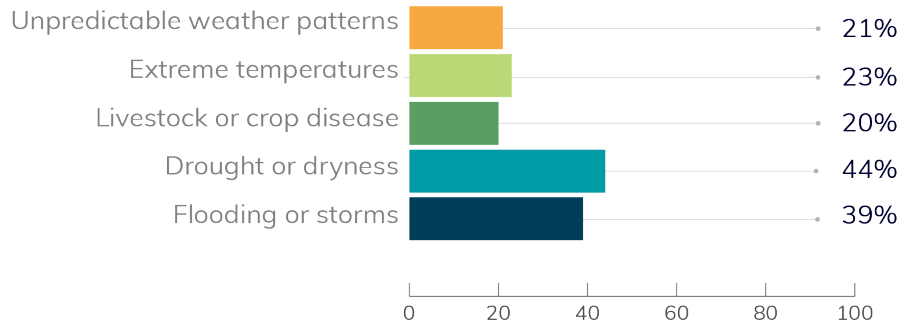

Both slow and sudden onset disasters are connected to migration - droughts and dryness, as well as storms and flooding.

EAST AFRICA

WEST & CENTRAL AFRICA

ASIA

LATIN AMERICA

Refused answers: 3% among East Africans, 11% among West and Central Africans, 17% in Asia and 1% in Latin America;

Other answers: 16% among East Africans, 6% among West and Central Africans; 1% in Asia and 1% in Latin America.

STORIES FROM AFRICA, ASIA AND LATIN AMERICA

Communities, population groups, and individuals are impacted differently; understanding the varied climate impacts and mobility outcomes.

IMMOBILITY

KARAMOJA, AGRO-PASTORALIST
COMMUNITY, UGANDA

*Only men own property here.
This has tied our hands.*

Women's focus group discussion
participant

GENDERED IMPACTS

Women are more engaged in subsistence agriculture; women do not own land or property

IMPACTS OF CLIMATE-INDUCED STRESSORS

75%

Affected by drought

66.7%

Affected by land
degradation

WHY DO PEOPLE STAY?

82%

Of women are not
considering moving

MOST THINK CHANGES ARE POSSIBLE

Common solutions include farming/
gardening and working longer hours.

INTERNAL MOVEMENT

PRAIA NOVA, BEIRA,
MOZAMBIQUE

GENERAL PERCEPTION

66%

Think moving is normal

90%

Want to move

40%

Feel they are forced
to move

**MOST THINK
FLOODING,
RISING SEA
LEVELS, AND
STORM SURGES
WILL WORSEN
IN THE FUTURE.**

When the cyclone passes, I'm homeless, When a rise in sea level water reaches my house, it gets inside and damages a lot.

35-year-old woman
interviewed in Praia Nova

IMPACTS OF CLIMATE-RELATED EVENTS

Loss and damage to
assets, health, safety
and security

WHY DO PEOPLE STAY?

80%

Believe that
unsustainable measures
such as working longer
hours and selling assets
can improve the
situation

WHY DO PEOPLE MOVE?

There is permanent and temporary
displacement from Beira because of
storms and flood damage

EXTERNAL MIGRATION

BANGLADESH

A FAMILIAR STORY: CLIMATE CHANGE IS A THREAT MULTIPLIER

Bangladeshis turn to people smugglers to reach Malaysia and beyond because of economic insecurity and poverty exacerbated by climate change impacts.

WHY DO PEOPLE MOVE?

32%

The environment is
a direct driver

60%

Consider flooding
as the main hazard

54%

Report extreme
temperatures

“

I migrated because of a lack of opportunities in my own country, but even in Malaysia, I cannot make a comfortable life because I'm illegal.

A 38-year-old man who left Barisal, Bangladesh partly because of drought

EXTERNAL MIGRATION

HONDURAS

Respondents who left Honduras due to environmental factors, among others, were often **travelling with children on a treacherous journey through Mexico** to the United States.

Photo credit: Panos

19%
**OF RESPONDENTS
CONSIDERED ENVIRONMENTAL
FACTORS TO BE A DIRECT
DRIVER OF MIGRATION**

**WHY DO
PEOPLE MOVE?
CLIMATE
STRESSORS AND
OTHER FACTORS
CONTRIBUTE TO
MIGRATION**

**43% Male
63% Female**

Increased frequency of
extreme weather events

**OF THOSE LEAVING DUE
TO ENVIRONMENTAL
FACTORS**

56%

Threat to survival

50%

Poverty

“
The times we are living in are very difficult, it forces us to leave our homes, but it is better to be at home with little than to be out here enduring so many things, with uncertainty and without knowing what is going to happen.

26-year-old man from Lempire, Honduras, interviewed in Tijuana, Mexico, partly motivated to move by unpredictable weather patterns

KEY MESSAGES

THE LINK BETWEEN CLIMATE AND MOBILITY IS COMPLEX

The impacts of climate-related events are often **one of several drivers** of mobility.

CLIMATE IMPACTS ARE CONNECTED TO OTHER DRIVERS OF MOVEMENT

Climate change and environmental factors are not independent but **closely connected to other drivers** influencing migration.

STRESS MULTIPLIER

Climate-related factors **prove a stress multiplier** when making a decision about migration.

OPTIMISTIC

Despite the worsening of climate-related events, this does not negatively affect most people's perceptions of their future well-being.

STAY AND ADAPT

Adaptation strategies rarely appear to be sustainable. The most common ones are working longer hours and reducing food consumption.

**IMMOBILITY IS COMMON AND
RESILIENCE IN PLACE, NOT DEPARTURE,
WAS THE PRIMARY OBJECTIVE**

SHORT-DISTANCE & INTERNAL

Our findings do not support the often-heard narrative of large-scale climate-induced transcontinental migration.

URBANISATION TREND

Climate mobility will be part of the urbanisation trend – people moving to nearby cities.

FINAL THOUGHT

THE INTERSECTION OF CLIMATE CHANGE AND MIGRATION

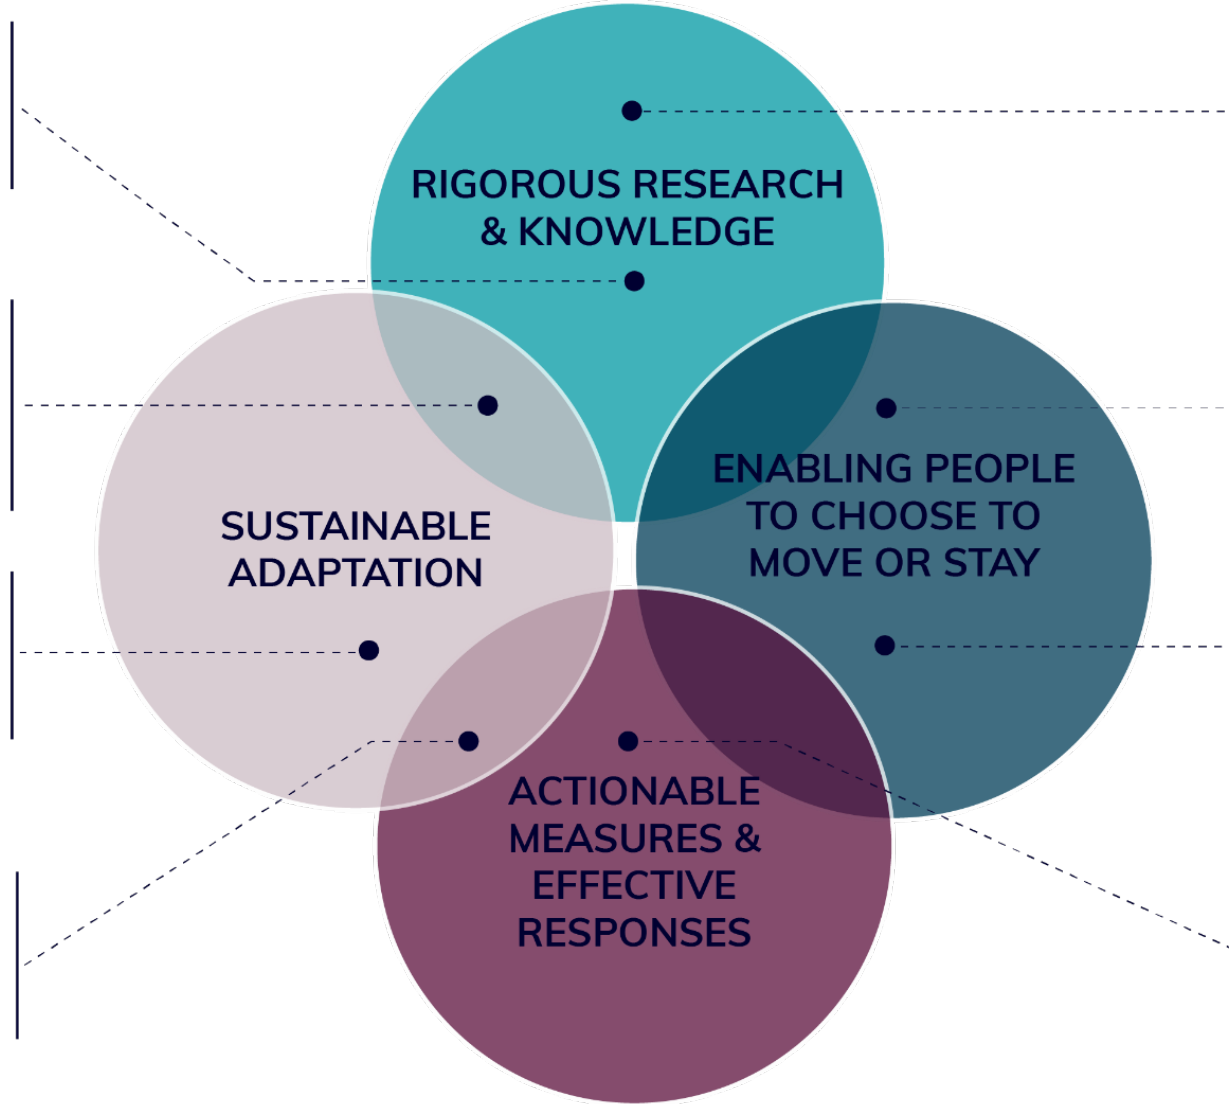

Differences between contexts and population groups mean knowledge needs to be local

Vital to consider the capacity to adapt, and where mobility lies within that, to formulate effective strategies for sustainable adaptation

Where people cannot stay, solutions need to be found together

Enable people to choose and to thrive

Understanding the complexity of links between climate change and mobility; accounting for intersectionality

Migration can be among the positive and negative adaptation strategies to climate change

Acknowledging the positive and negative effects of staying

Knowledge enables us to take action to address a complex issue; local and targeted responses are key
